This is an exciting opportunity for Summer 2013! Be swept away by beautiful tropical scenery while learning about Belize’s diverse ecosystem and earning elective credit for IDS 2159 Environmental Issues. Taking place over 10 days in June 2013, participants will divide their time between exploring the tropical rainforest and learning about Belizean marine life.

Highlights include:

- Hike in the rainforest at Hill Bank Field Station and learn about sustainable forestry efforts.
- Snorkel in the Belize Barrier Reef, a UNESCO World Heritage Site.
- Visit the Mayan ruins at the Lamanai Archaeological site.

Scholarships available!

Dates: June 2013, specific dates TBD
Cost: TBD
Course: IDS 2159 Environmental Issues, 3 credits
Program enrollment starts in January 2013.

I had such an amazing time in Belize and met a wonderful group of people. It was a great feeling to be among my peers and to see professors outside of their usual setting.

Johanna Arroyo, participant of the 2012 trip to Belize
